

JAI SHARMA

(+91) 9782180910 | jai.sharma9782@gmail.com | <https://www.linkedin.com/in/jai-s-5a576b213/>

PROFESSIONAL SUMMARY

Experienced Senior Software Engineer specializing in front-end and mobile application development. Adept at crafting elegant and efficient user interfaces, with a strong foundation in responsive design and cross-platform development. Proven track record of successfully delivering high-quality solutions within tight deadlines. Expertise includes proficiency in modern front-end frameworks, mobile technologies, and a commitment to staying abreast of industry trends. Demonstrated leadership and collaboration skills, contributing to the success of cross-functional teams.

EDUCATION

B.Tech Computer Science - JK Lakshmipat University, Jaipur July 2016 - June 2020
Relevant Coursework - Object Oriented Programming, Application Development, Data Structures and Algorithms, Operating System, Software Engineering

SKILLS

- Nuxt JS
 - Vue JS
 - GSAP
 - React JS
 - Redux
 - Google APIs
 - Bootstrap
- HTML/HTML5
 - CSS/CSS3
 - Javascript
 - Azure Cloud

PROFESSIONAL EXPERIENCE

- Senior Software Engineer, Zensar Technologies, Pune, India**

January 2021 - Till Date

 - Designed and implemented efficient, scalable, and accessible web interfaces to enhance user experience.
 - Extensive development experience using Nuxt.js for frontend applications.
 - Successfully integrated RESTful APIs into various client-side projects.
 - Implemented caching mechanisms and optimized code and asset delivery for REST APIs and server-side applications, including lazy loading strategies.
 - Proficient in agile development methodologies such as Scrum, Design Thinking, continuous integration, continuous testing, and iterative development.
 - Hands-on experience with cloud environments, particularly Azure Cloud.
- Software Engineer, Dewlogics, Ahmedabad, India**

May 2020 - December 2020

 - Implemented responsive design across multiple web applications using modern frameworks like React JS.
 - Proficient in utilizing open-source toolkits such as MaterialUI, ReactBootstrap, and integrating Google APIs including Distance Matrix and Directions Matrix.
 - Experienced in setting up CI/CD deployment pipelines on Azure.
- Software Engineer (Intern), Saachi Technologies, Jaipur, India**

January 2020 - April 2020

 - Extensive experience in mobile architecture and developing scalable, high-quality products for production environments.
 - Strong focus on implementing best practices and designing for reusability in cross-platform applications.
 - Skilled in crafting complex UI components with expertise in CSS, animations, orchestration, and responsiveness.
 - Proficient in managing sophisticated application states using frameworks such as Redux and similar technologies.
 - Implemented Push Notifications feature using Firebase API to enhance user engagement and retention.
 - Developed multiple cross-platform applications using React Native, ensuring optimal performance and user experience across platforms.
 - Created RESTful APIs with Node.js, establishing endpoints for seamless data retrieval and manipulation.
 - Integrated Google APIs including Geolocation, Direction Matrix, and Distance Matrix to leverage location-based services and data insights effectively.
- Co-founder/Full-Stack Developer, Carentings**

 - Created the design via Adobe XD and implemented the same using ReactJS and React Native
 - Created a cloud environment for the product from scratch and deployed the solution in GCP
 - Worked on backend connectivity with MongoDB Database.
 - Created RESTful APIs using NodeJS, to create endpoints to retrieve and implement the necessary data for various functionalities

CERTIFICATIONS

- Responsive Web Design Certification (FreeCodeCamp)
 - React - The Complete Guide 2023 (incl. React Router & Redux)
- May 2020
